Stress test (adversarial for greedy) · spider trees, degree weights · NOT part of the main plots
Exact (tree DP)
Ours (GNN+RL + RR, 2 seeds)
Greedy + RR
Total weight W(S)
Number of nodes (n)
Extra cost W(S) − W_exact
Number of nodes (n)
W(S) / W_exact
Number of nodes (n)
Ours optimal in 7% | Greedy optimal in 8%
